The primary reason for allowance of claims 5-13 is the claim 5 limitation of varying the flash trigger time according to whether the object distance is the same in the first and second frames. The primary reason for allowance of claims 16 and 17 is the claim 166 limitation for a control unit that determines a flash trigger time according to the measured distance in response to the consecutive shooting mode signal. The primary reason for allowance of claims 18 and 19 is the claim 18 limitation that the control unit determines a flash trigger time corrected according to the result of comparison of distances in the present and preceding frames.
